

Continuous improvement: Ideas, best practice and innovation

Nico Hawkins
General Manager

18 August 2014

Introduction

- Purpose and processes of SAGIS
- SAGIS – Last two years
- GSI / Agricultural business' interaction
- Main challenges and how GSI can help
- New or alternative analysis and services

SAGIS' main purpose:

- Gathering
- Processing
- Analysing
- Timeous distribution

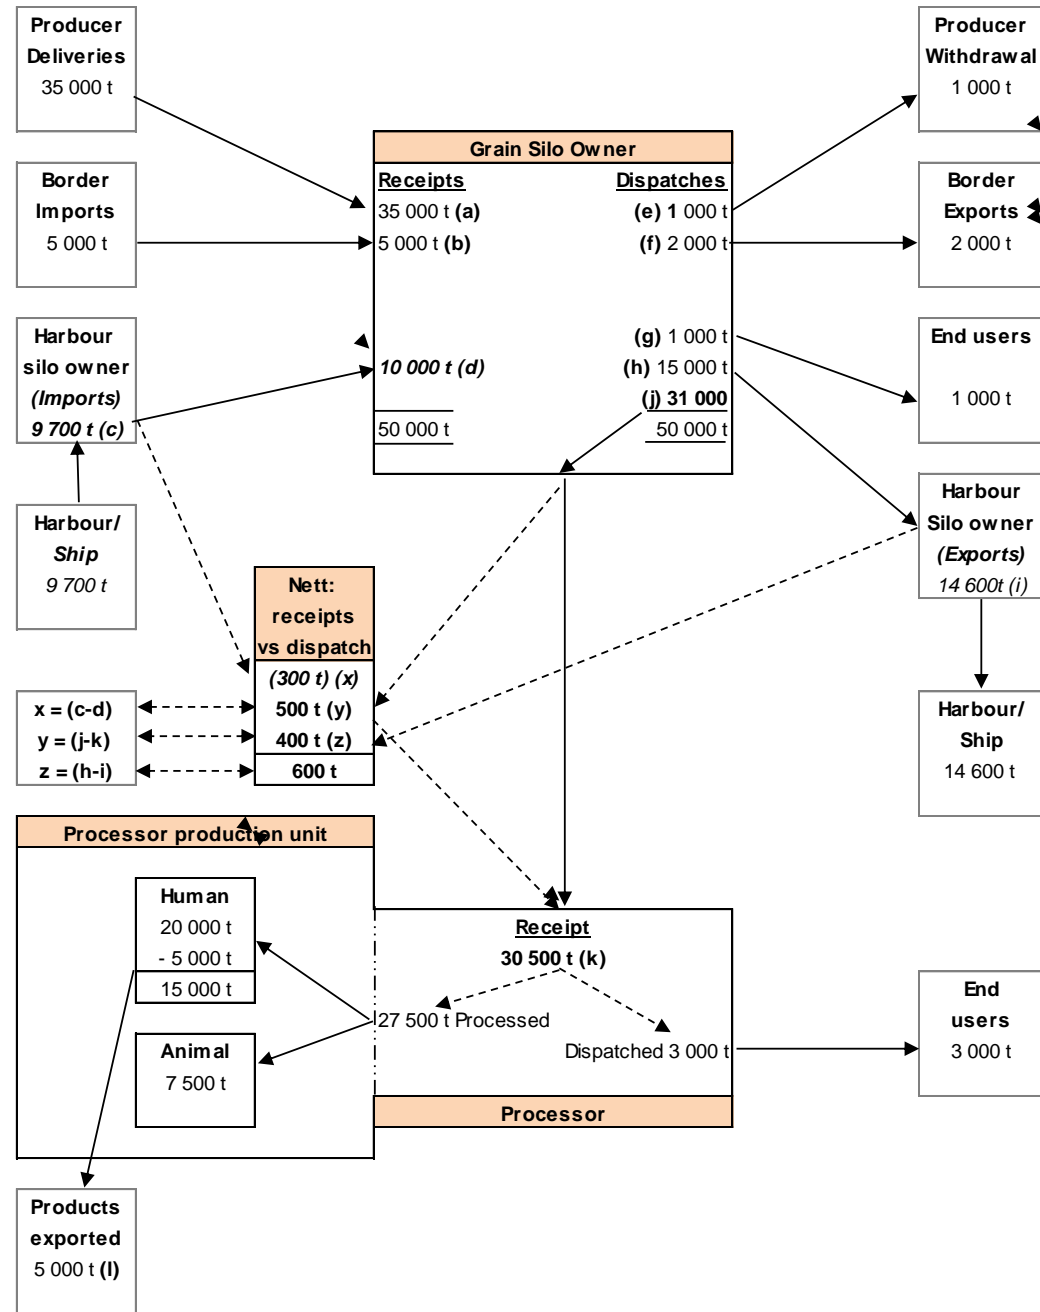

Capturing & Processing

Data processing e.g. Dispatches and receipts

Movement of Whole grain as declared on Returns

- (a) Producer deliveries direct from farms
- (b) Receipts direct from RSA border posts
- (c) Delivered at harbour premises direct from the ship (declared by Harbour silo Owner / Portnet) = imports
- (d) Receipts from RSA harbours
- (e) Withdrawal from producers
- (f) Whole grain dispatched to border posts
- (g) Released to end-consumers
- (h) Dispatched to RSA harbours
- (i) Wholegrain released from harbour premises to ship (declared by Harbour silo Owner / Portnet) = exports
- (j) Dispatched to other RSA premises
- (k) Receipts from other RSA premises
- (l) Products produced in RSA exported (declared by the processor)

Process nett receiving and dispatches

What and how SAGIS gathers and distributes info

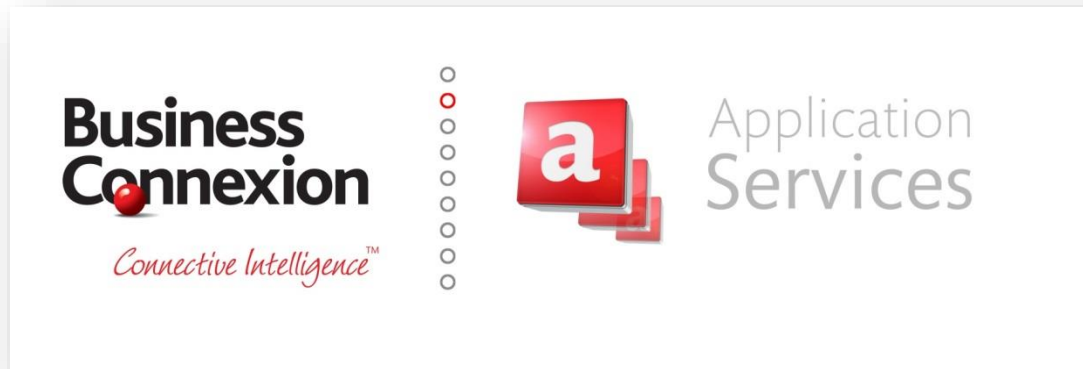

- Opening stock
- Acquisition
 - Local
 - Producers
 - Other role players
 - Imports
- Dispatches
 - Locally
 - Exports
- Process
 - For local use
 - For exports
- Ending stock

Changes during the last two years

- ✓ SAGIS' monthly system has been upgraded
- ✓ SAGIS' weekly system has been automated
- ✓ Upgrading of SARS information system
- ✓ Attempts to 'package' standard information more user-friendly

SAGIS' monthly system has been upgraded

- Old system was not compatible with new Windows version.

Upgrading of weekly information

- Returns are now – just as monthly information – automatically imported and processed.

Upgrading of SARS information system

- Technical and financial aspects prevented that SARS info system was not automated.
- SAGIS developed its own more user friendly system.

**SARS - TARIFF LINES
SAID - TARIIEFLYNE**

January/Januarie 2004 - April 2014

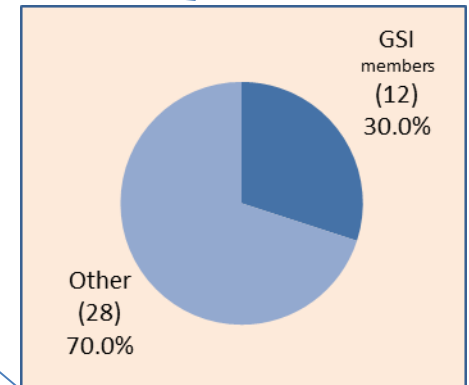

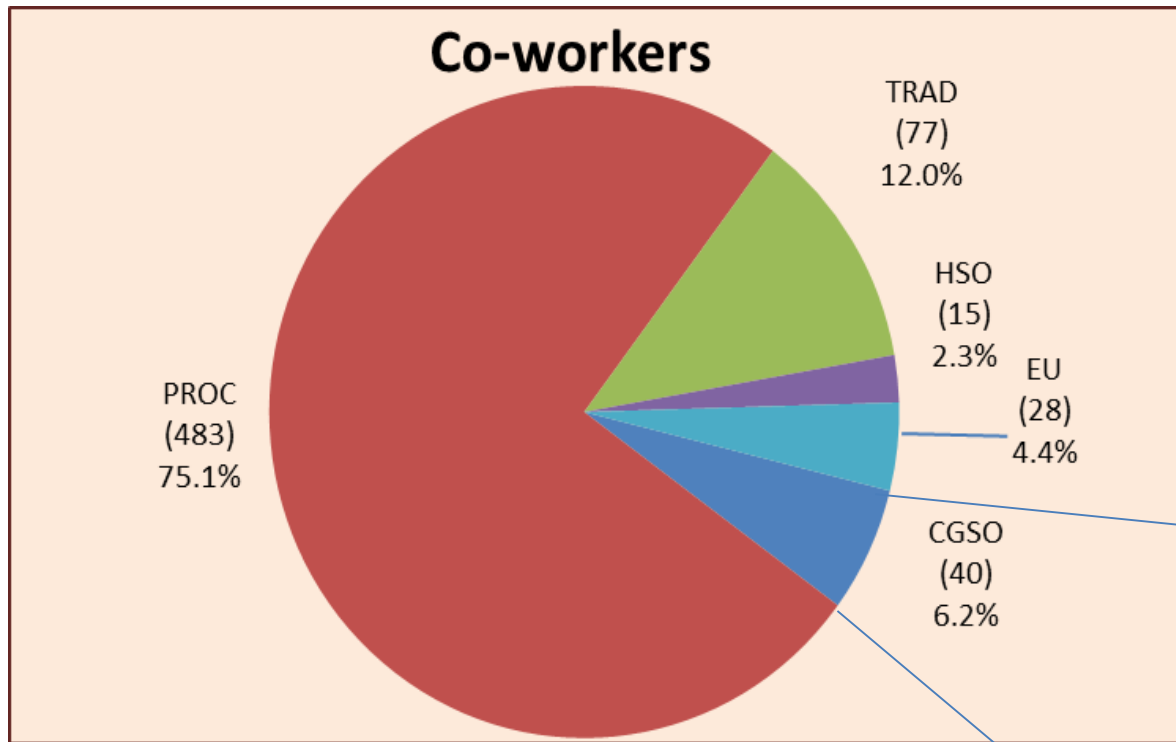

Chapter 10	Product Description
	1001.19 Durum wheat - Other
	1001.99 Wheat - Other
	1002.90 Rye - Other
	1003.90 Barley - Other
	1004.90 Oats - Other
	1005.10 Maize - Seed
	1005.90.10 Maize - Dried kernels
	1005.90.90 Maize - Other
	1006.10 Rice - In the husk (paddy & rough)
	1006.20 Rice - Husked (brown) rice
	1006.30 Rice - Semi milled or wholly milled
	1006.40 Rice - Broken rice
	1007.90 Grain Sorghum - Other
	1008.29 Millet - Other
	1101.00.10 Wheat or Meslin flour - Brown wheaten meal
	1101.00.90 Wheat or Meslin flour - Other
	1102.20 Cereal flours - Maize flour
	1102.90.15 Cereal flours - Other - Oats flour
	1102.90.30 Cereal flours - Other - Sorghum flour
	1102.90.50 Cereal flours - Other - Rye flour
	1103.11 Groats and meal - Wheat
	1103.13.10 Groats and meal - Maize
	1103.13.90 Groats and meal - Maize Other

Benefits of new development

- Three temporary positions were terminated.
- Two permanent positions were consolidated.
- Less human errors.
- Compatible with other IT programs.

GSI / Agricultural business' share / interaction

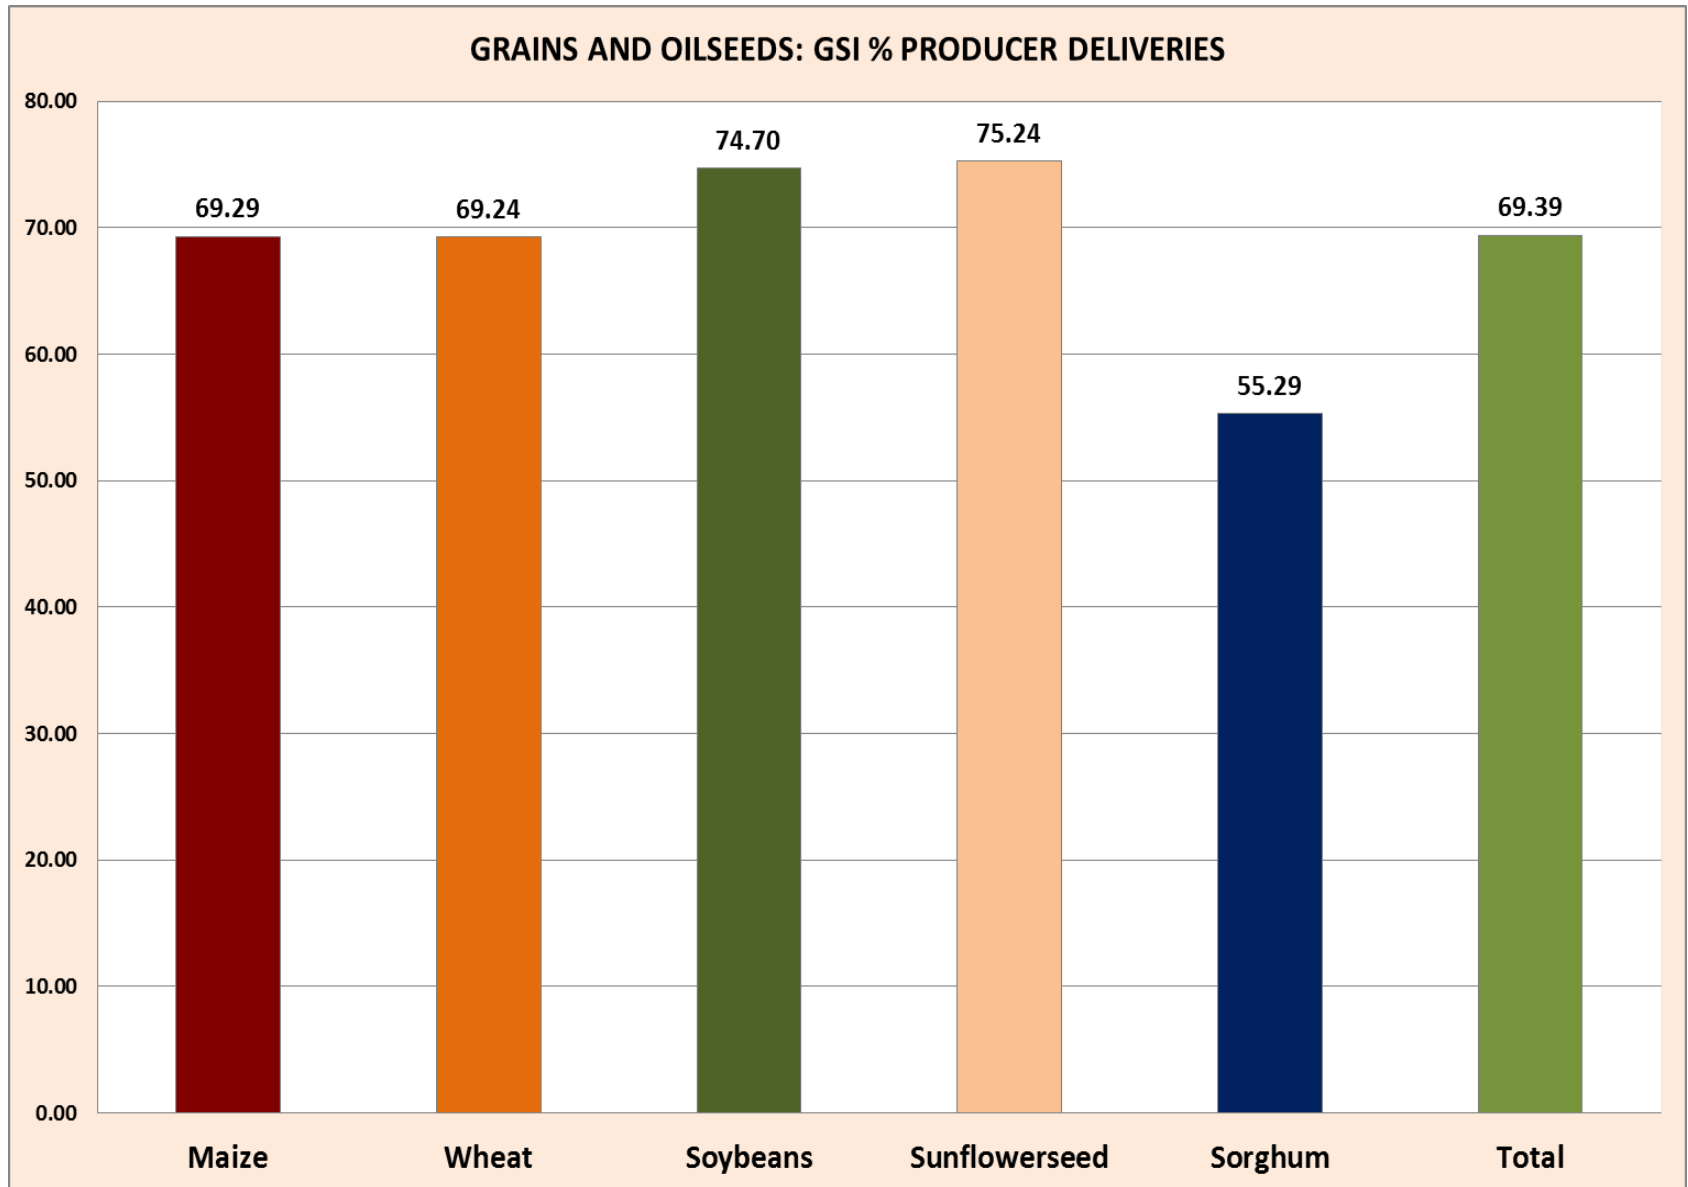

Co-workers	
Commercial Grain Silo Owners	CGSO
Processors	Proc
Traders	Trad
Harbour Silo Owners	HSO
End users	EU

GSI / Agricultural business' share / interaction

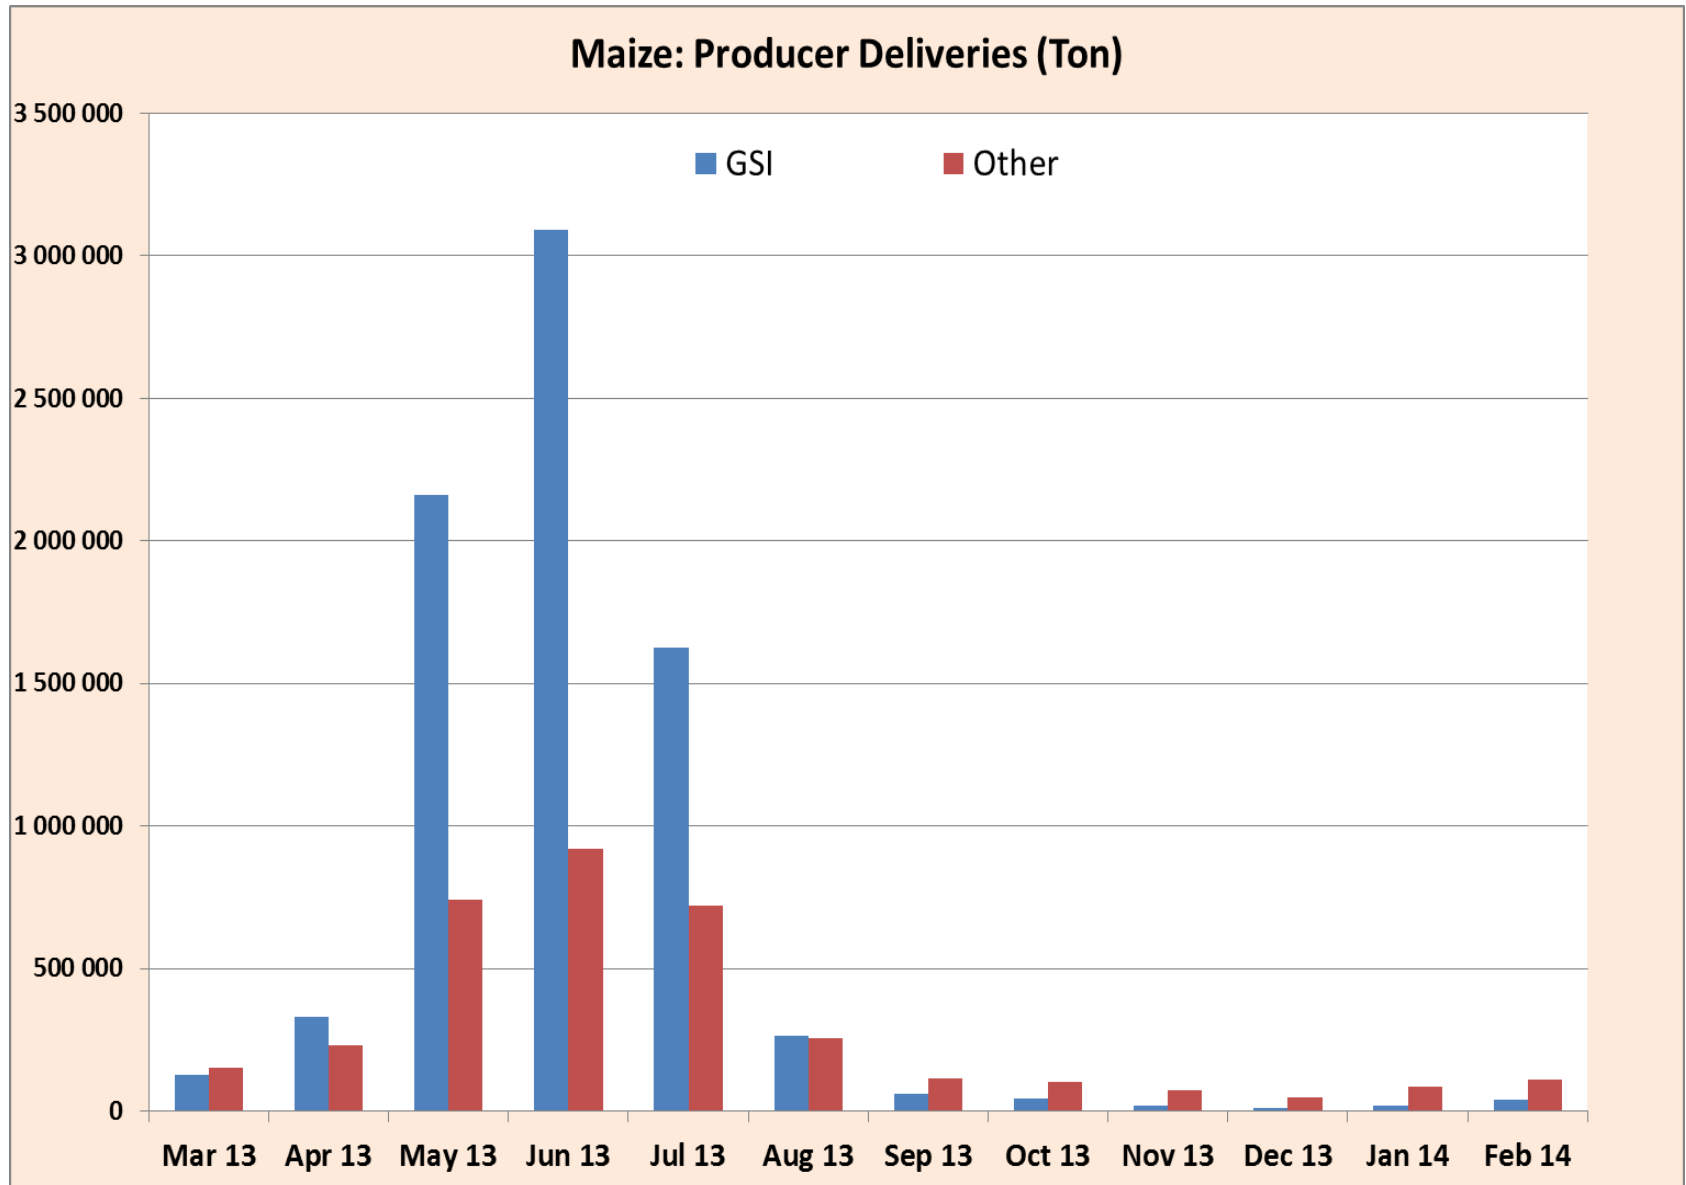

% Share of GSI members in RSA grain movements (3 year average)

	Maize	Wheat	Soybeans	Sunflower-seed	Sorghum
Opening stocks	78.87	57.09	70.27	86.1	40.97
Producer deliveries	69.29	69.24	74.7	75.24	55.29
Processing					
- Animal	0.81	0	4.37	0	0
- Human	0.98	0	0.02	0	0
Gristing	9.17	0	0	0	0

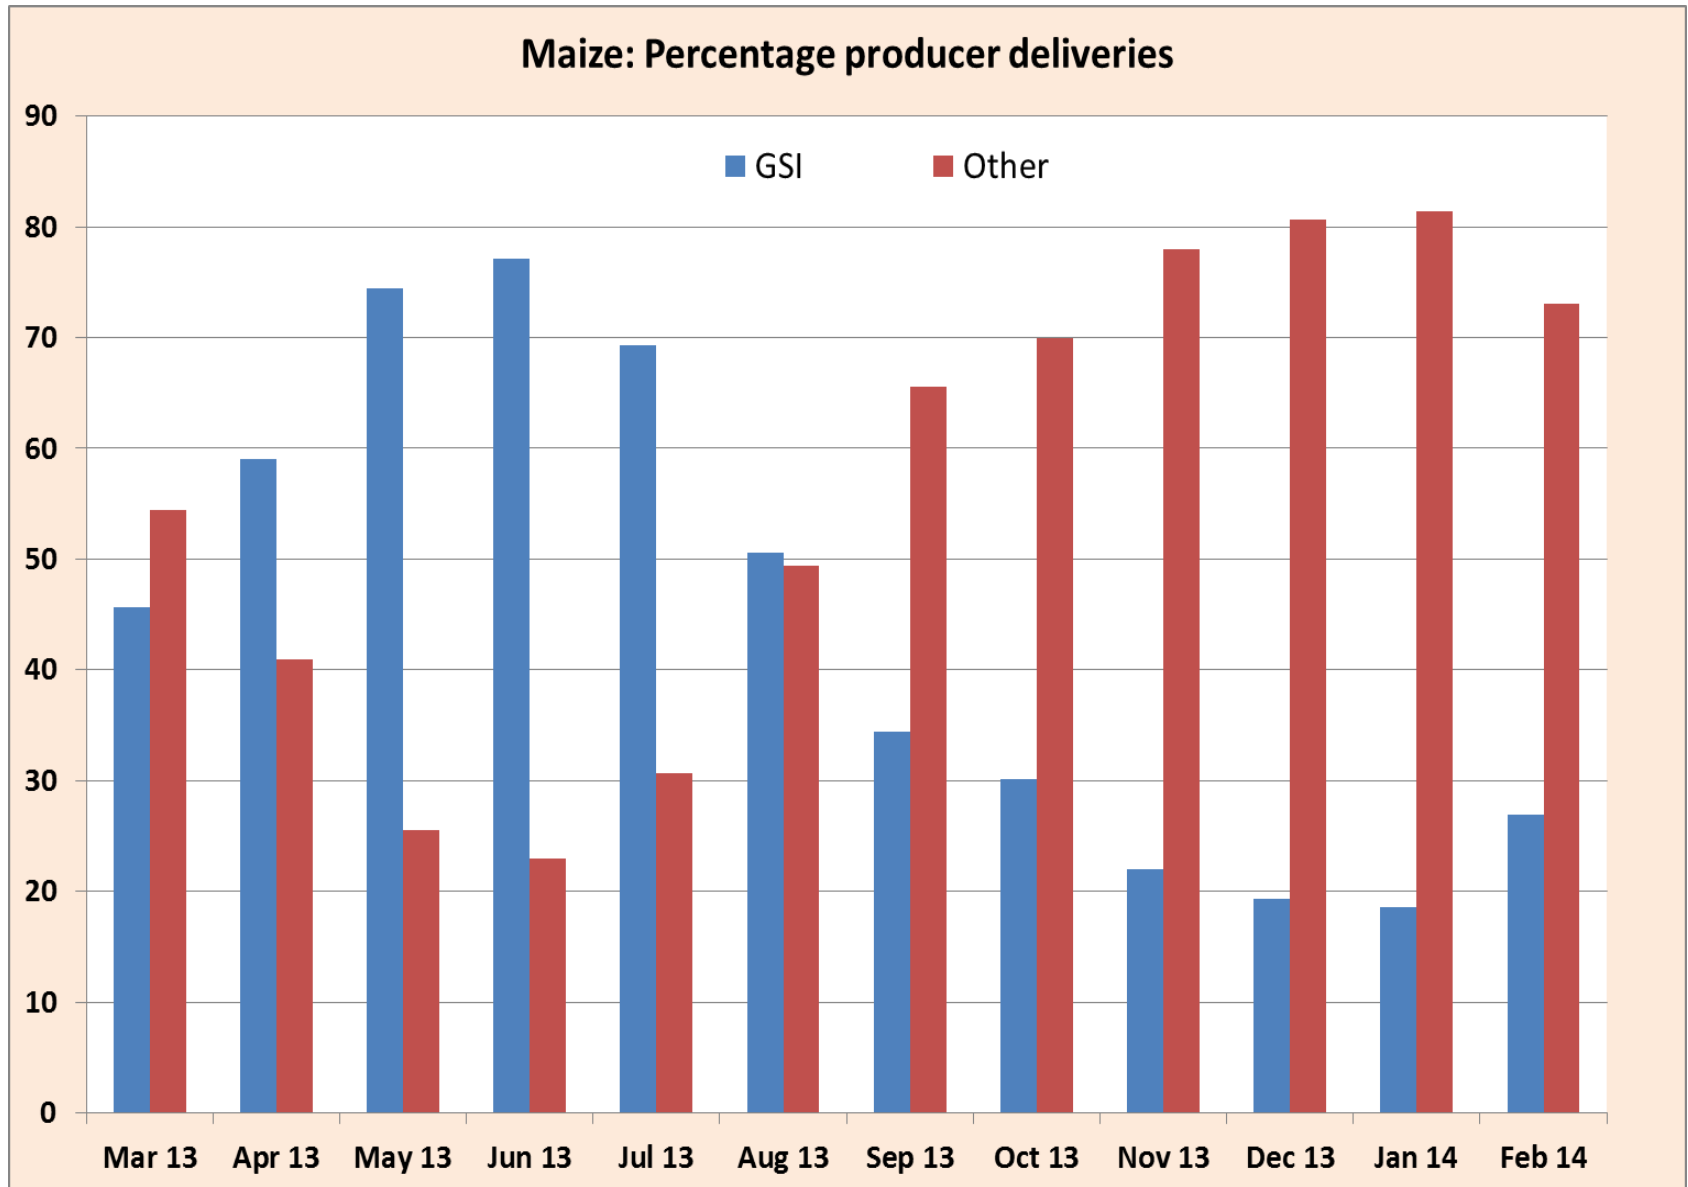

Percentage producer deliveries

Maize: Tonnage producer deliveries

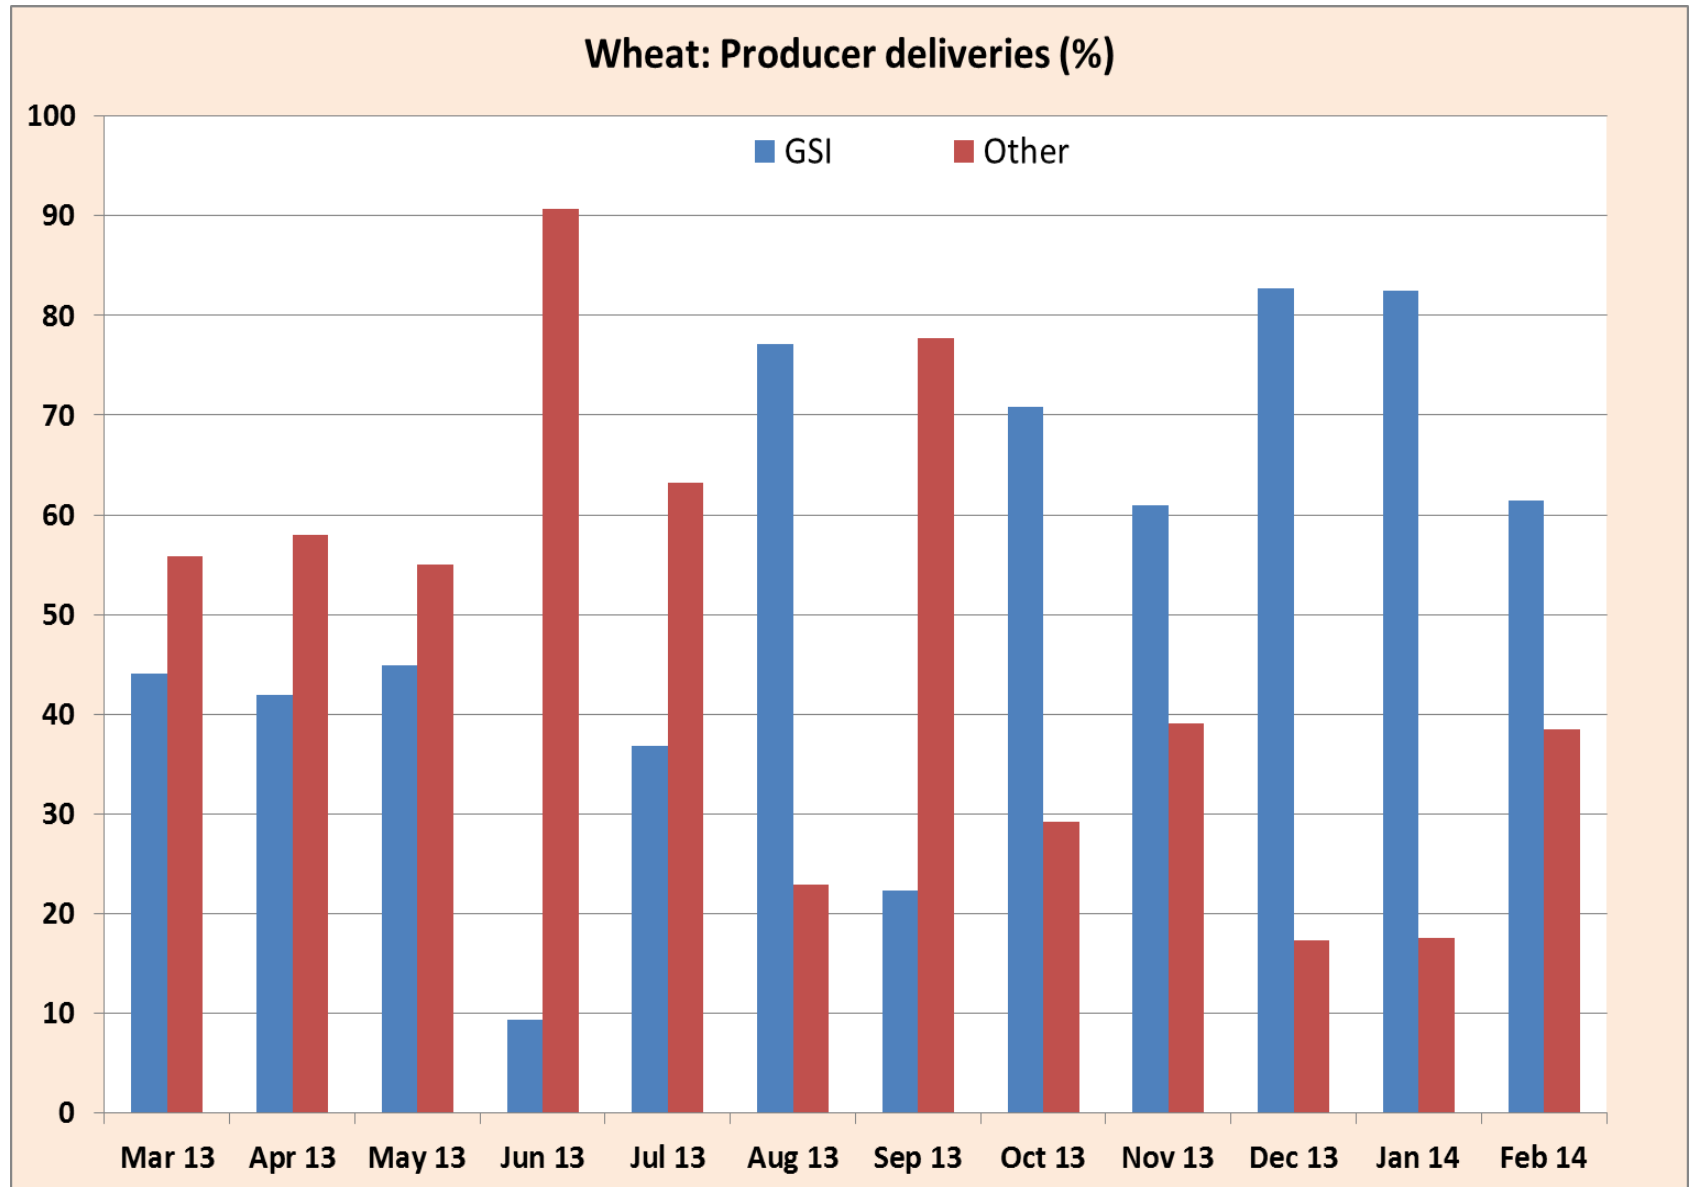

Maize: Percentage producer deliveries

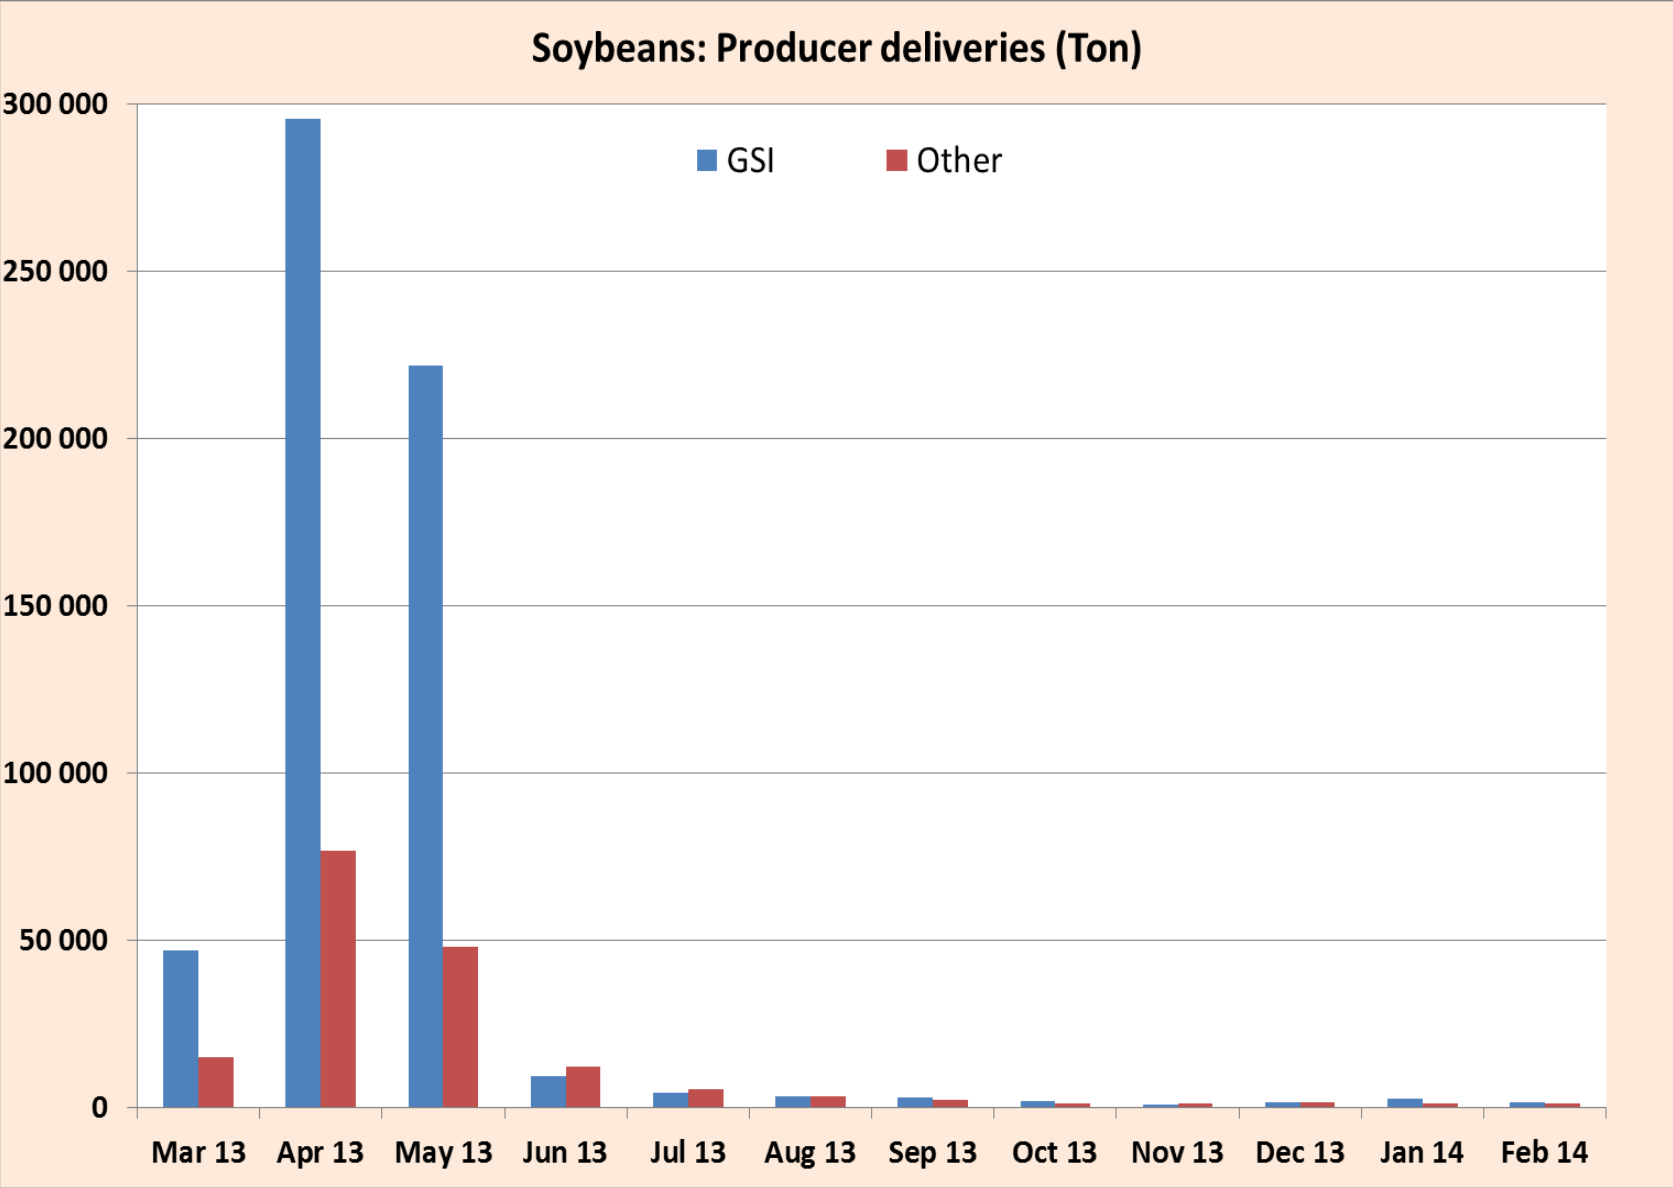

Wheat: Tonnage producer deliveries

Wheat: Percentage producer deliveries

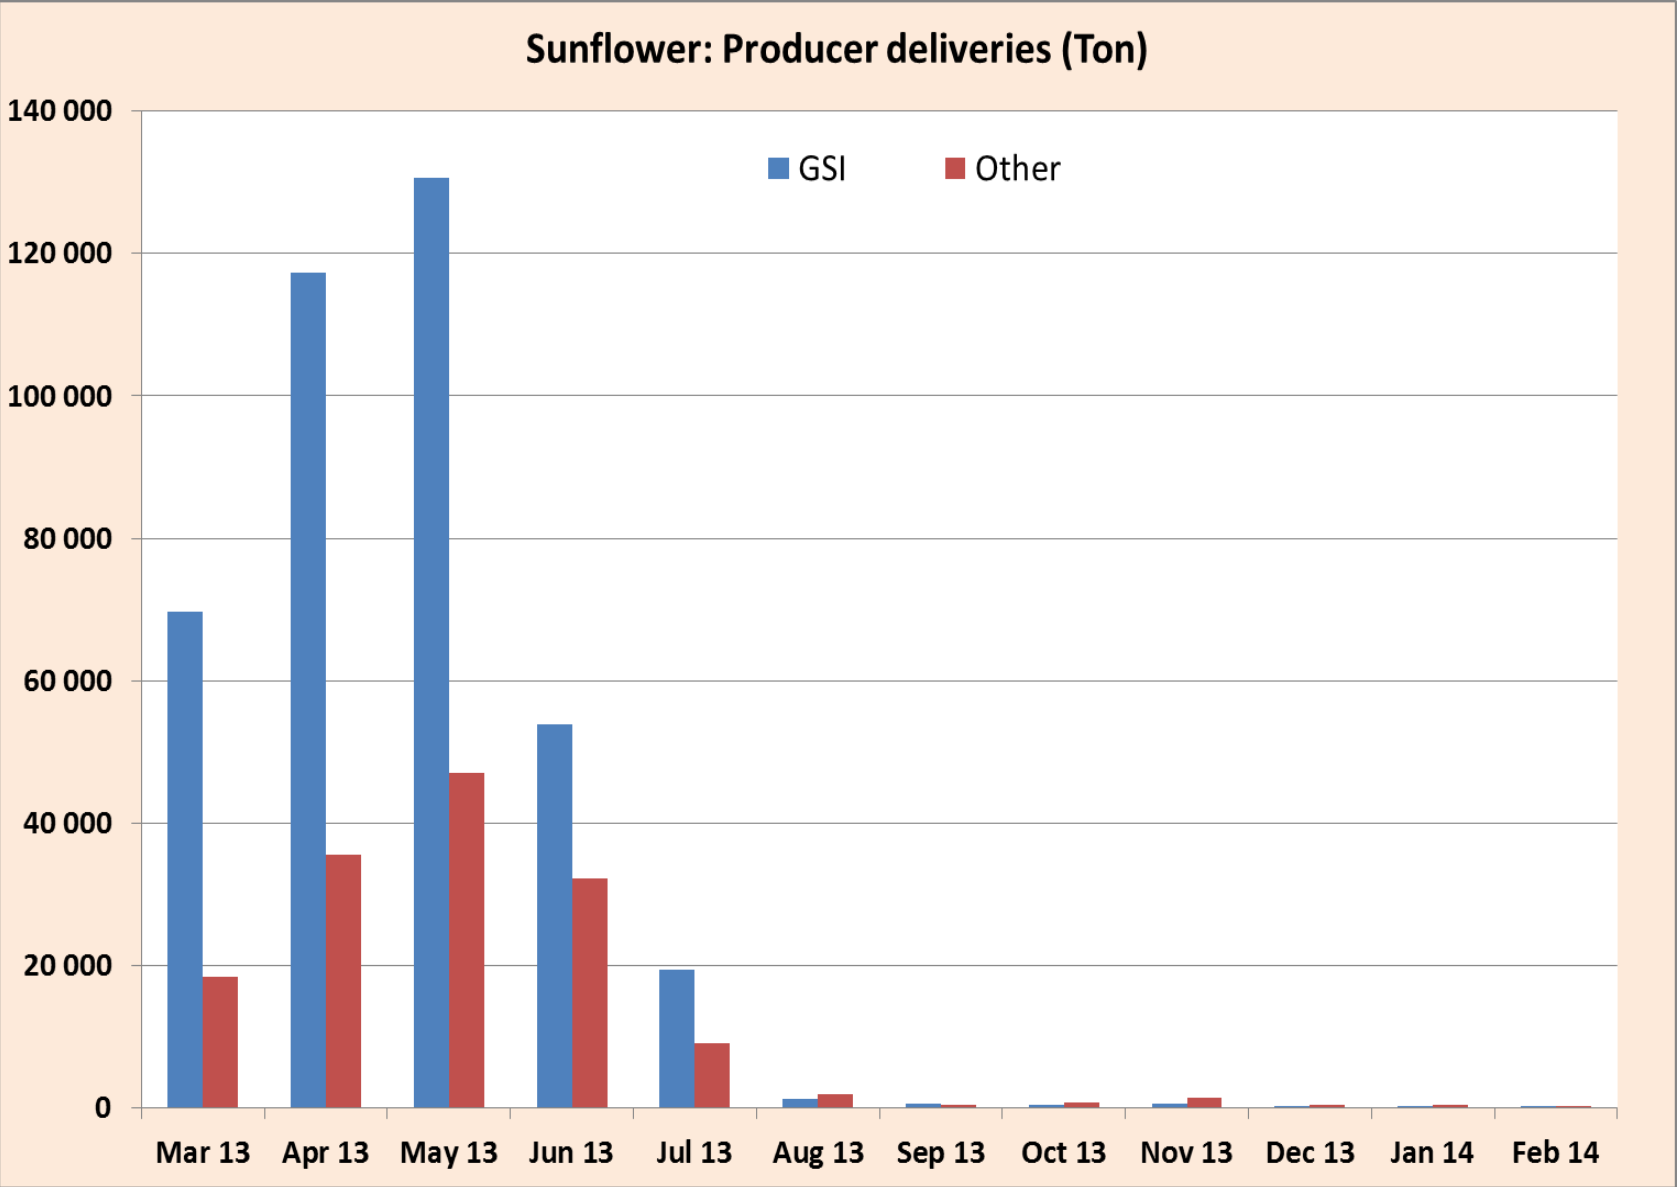

Soybeans: Tonnage producer deliveries

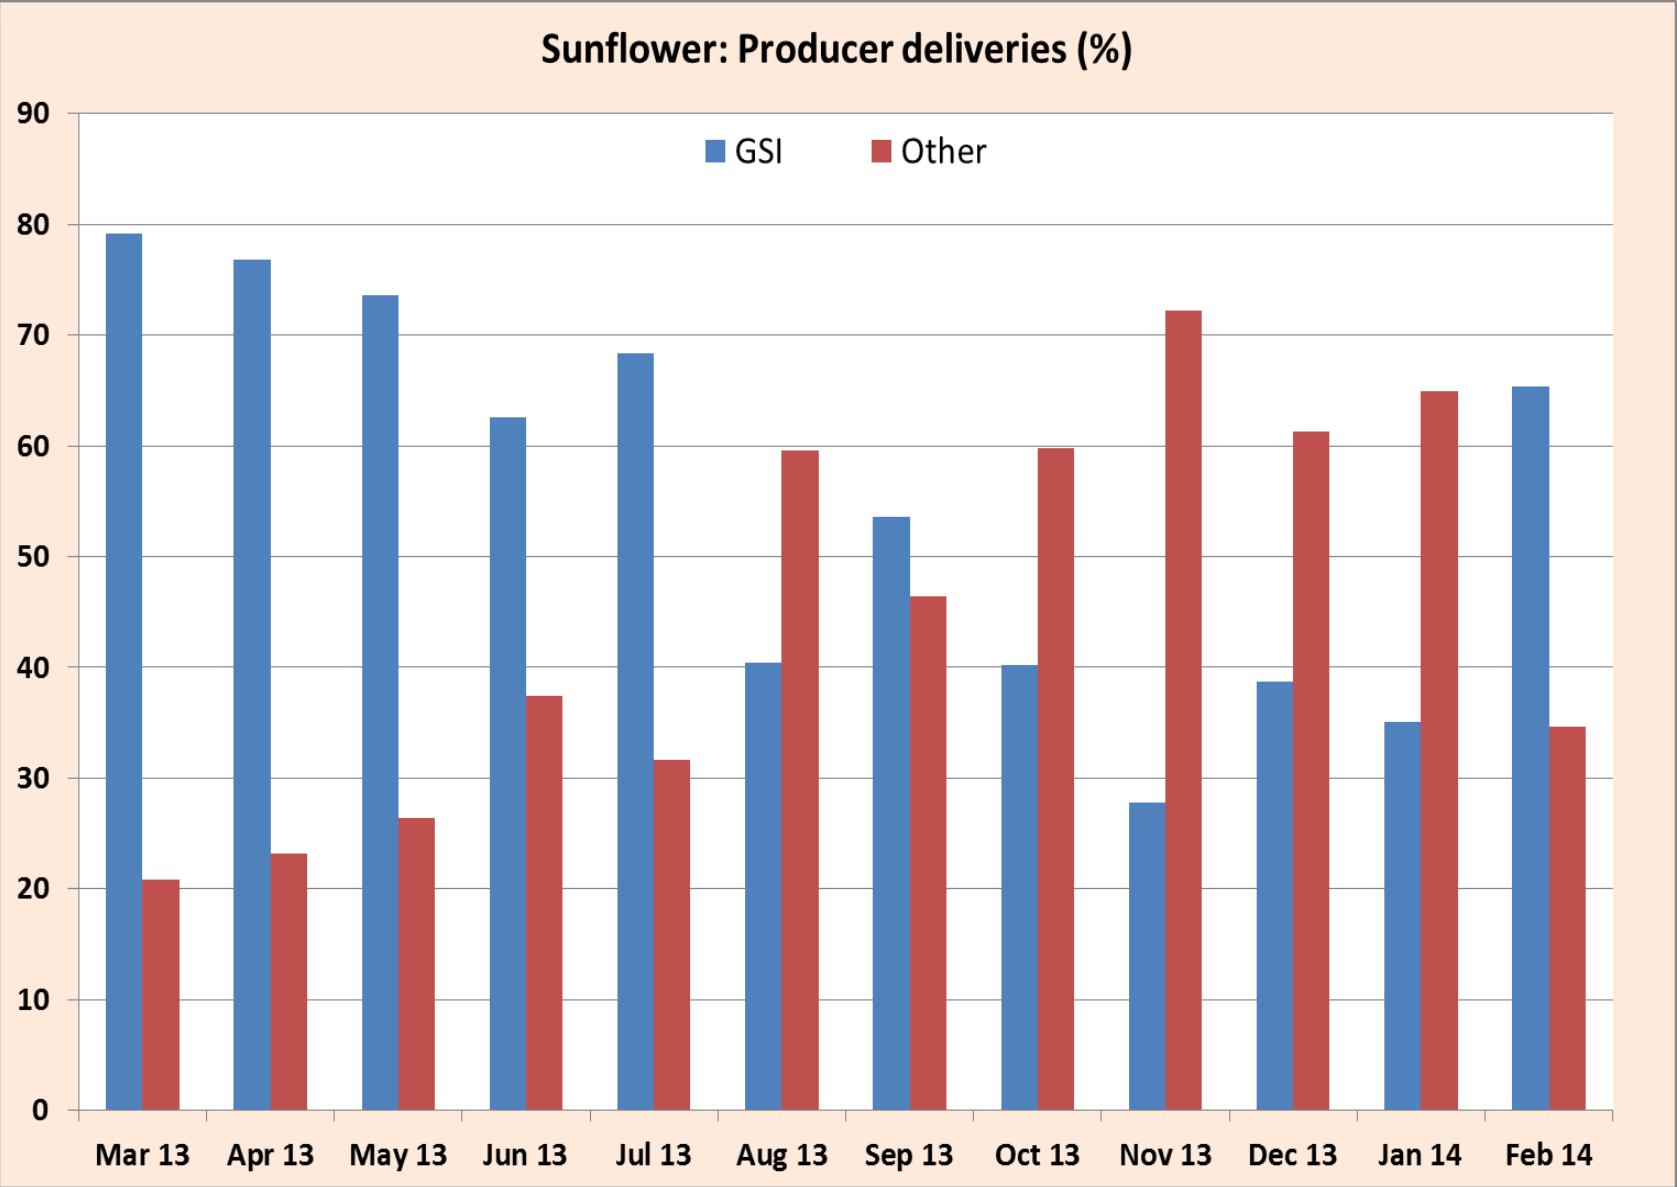

Soybeans: Percentage producer deliveries

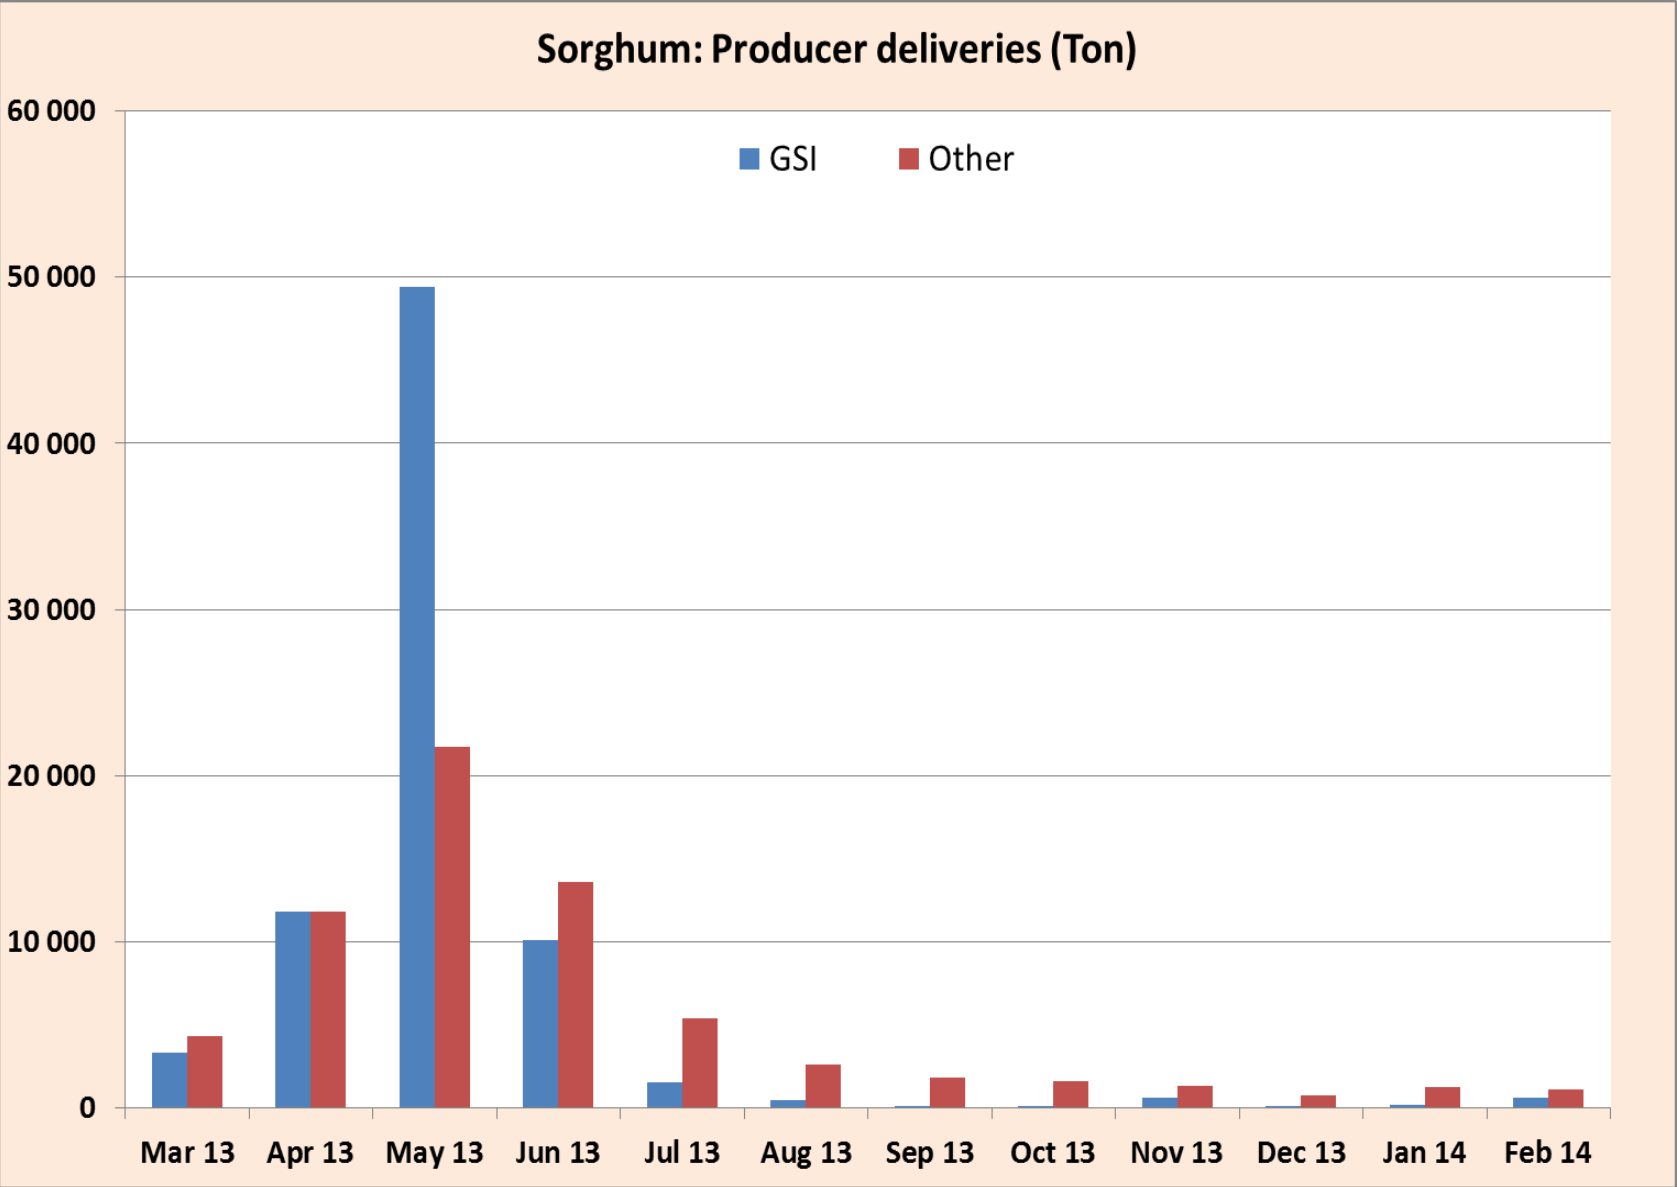

Sunflower: Tonnage producer deliveries

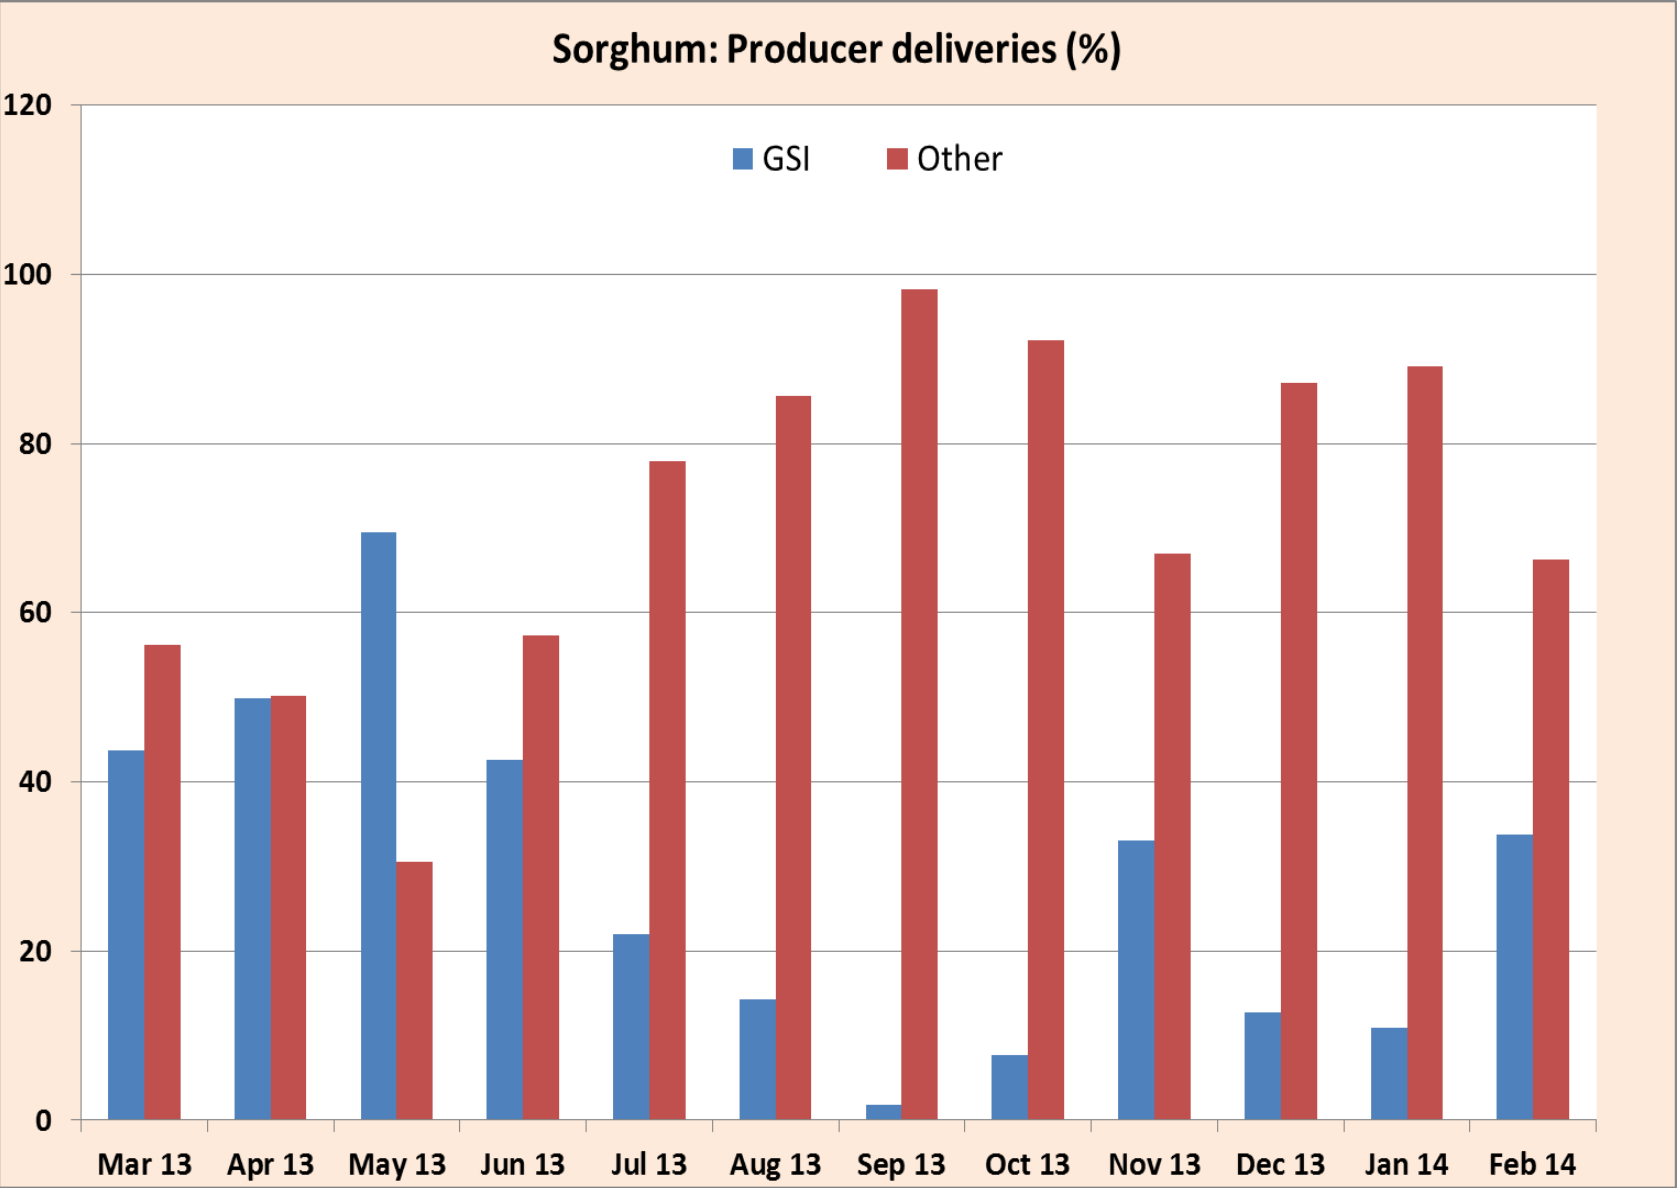

Sunflower: Percentage producer deliveries

Sorghum: Tonnage producer deliveries

Sorghum: Percentage producer deliveries

Main challenges SAGIS has to deal with and how GSI can help

- Duplication of producer deliveries (Agricultural businesses, traders & processors).
- Late submitting of mandatory returns.
- Late submitting or not submitting of non-mandatory returns (Producer deliveries).
- Reporting of wrong information on returns – verifying not possible without inspection – especially processing.
- Perception at SAGIS is that returns are done at a very low level and not checked by senior personnel.

New or alternative analysis and services

- Board of Directors of SAGIS has up until now not been very keen to take on new projects. It is however believed that SAGIS can add more value:
 - Independent verification (as third party) of info with permission of the co-workers, e.g. SAFEX Silo registrations.
 - Info for decision making with regards to business development in regional context.
 - Ad hoc requests. On a pay per project basis - surveys on behalf of industry role players on e.g. Share of black farmers with regard to producer deliveries.

Thank you
